

PRANJIT DASGUPTA (he/him)

B.Tech Student | Website & Android Developer

I'm Pranjit Dasgupta, a B.Tech student at TIT College Agartala, majoring in Computer Science and Engineering. I'm passionate about emerging technologies, frontend web development, and Android app development. I enjoy building real-world projects and solving problems through code while continuously learning new technologies and industry trends.

Beyond tech, I'm an avid chess player, artist, photographer, and mobile gaming enthusiast. I love exploring new ideas, collaborating on innovative projects, and connecting with like-minded individuals to create a meaningful impact in the tech community.

- Drone assembling and piloting.
- MS Office (Word, Excel, PowerPoint)
- Public Communication

Projects:

2023 - 2026

- **AQMS:** It is a low-cost, compact Air Quality Monitoring System for indoor environments using IoT-based sensors and real-time monitoring technology to measure and analyze air quality parameters efficiently. It is also an NGIN selected & funded project.
- **VisionMate:** A smart Android-based productivity and timer application designed for reliable background execution, real-time notifications, and seamless user interaction. Built with optimized foreground service architecture and advanced system-permission handling, the app ensures uninterrupted performance and enhanced task management across diverse usage scenarios.
- **HIVInsight:** HIVInsight is a preliminary HIV symptom assessment application that allows users to evaluate symptoms by answering a structured questionnaire. The app provides information about symptoms, precautions, treatments, medications, and possible side effects to offer a basic overview of the HIV virus.
